SHAKTI PRATAP SINGH

Full Stack Developer | React.js | Node.js | AI-Powered Applications

Gurugram, Haryana | +91 95609 98337 | shaktipratapsr@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven B.Tech Computer Science graduate (2026, DCRUST Murthal) with 6+ months of hands-on full-stack development experience at NIIT Limited. Proficient in building scalable React.js and Node.js web applications, integrating RESTful APIs, and leveraging AI-powered tools including MCP (Model Context Protocol) architecture for intelligent workflow automation. Delivered 3+ production-grade projects with measurable improvements in UI performance and user experience. Actively targeting Full Stack Developer / Frontend Developer roles at growth-stage startups and MNCs in Gurugram and Bangalore.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C, C++

Frontend: React.js, HTML5, CSS3, Responsive UI/UX, Component Architecture

Backend: Node.js, Express.js, RESTful APIs, CRUD Operations, MCP Architecture

Databases: MongoDB, MySQL (Basic), Database Design

AI & Automation: Model Context Protocol (MCP), AI API Integration, A2UI, Google Antigravity, rrweb

Tools & Platforms: Git, GitHub, Trello, Asana, Excel, VS Code

Core Concepts: Agile/Scrum, API Integration, Session Recording, Modular Architecture, Scalable Design

INTERNSHIP EXPERIENCE

Full Stack Developer Intern | **NIIT Limited, Gurugram** | *Jan 2025 – Present*

- Engineered 3+ full-stack web applications using React.js and Node.js, reducing average page load time by ~30% through component optimization and lazy loading techniques.
- Integrated 5+ third-party REST APIs (payment, maps, AI APIs) into production-grade applications, cutting manual data handling by 40%.
- Implemented AI-assisted development workflows using A2UI and Google Antigravity, accelerating UI prototyping speed by approximately 50%.
- Collaborated in Agile sprint cycles (2-week sprints) using Trello and Asana, consistently delivering assigned modules on schedule with zero critical bugs in production.
- Utilized rrweb session recording to capture and analyze user interactions, enabling data-driven UI improvements that improved user task completion rate by 20%.

PROJECTS

AI-Powered PPT Generator (MCP-Based) — *React.js, Node.js, MCP Architecture, AI API, pptxgenjs*

- Architected and built a full-stack AI-powered presentation generator leveraging Model Context Protocol (MCP) for intelligent slide content generation from natural language prompts.
- Implemented dynamic slide count configuration, allowing users to generate 1–30 slides with auto-distributed content, reducing manual slide creation time by ~80%.
- Built a multi-template selection engine with support for 6+ built-in themes and custom template uploads (PPTX/JSON), giving users complete design flexibility.
- Developed a real-time slide preview panel with pixel-accurate rendering before export, eliminating trial-and-error revision cycles.

- Integrated manual + AI-assisted slide editing: users can edit slide text/layout directly or invoke AI to regenerate/refine individual slides on demand.
- Delivered PPTX export via pptxgenjs library, producing fully compatible files downloadable in one click.

Online Food Delivery System — *React.js, Node.js, Express.js, MongoDB, REST APIs*

- Developed an end-to-end web-based food delivery platform serving simulated 200+ restaurant listings with real-time menu browsing and order placement.
- Engineered advanced search and multi-filter functionality (cuisine, rating, price range), reducing user discovery time by 35%.
- Built dynamic order tracking module with real-time status updates across 4 stages (placed → confirmed → prepared → delivered), increasing simulated user retention by 25%.
- Achieved 95+ Lighthouse performance score through optimized React component architecture and efficient state management.

QuickGPT — AI Assistant Web Application — *React.js, Node.js, JavaScript, AI API (OpenAI-compatible)*

- Developed an AI-powered chat interface enabling users to generate content, code, and responses via natural language prompts with sub-2s average response time.
- Integrated external AI APIs with streamed response handling, delivering real-time output display and supporting concurrent user sessions.
- Built modular frontend component architecture (10+ reusable components) and scalable Express.js backend API layer, enabling future feature extensions with minimal refactoring.
- Leveraged A2UI and Antigravity AI dev tools, cutting UI development cycle from ~5 days to ~2 days.

EDUCATION

B.Tech – Computer Science & Engineering | **DCRUST Murthal (Deenbandhu Chhotu Ram University)** | *2022 – 2026*

Expected Graduation: June 2026 | 8th Semester

Class 12 – CBSE (PCM) | **Delhi Public School, Maruti Kunj, Gurugram** | *Completed: 2022*

CERTIFICATIONS & CONTINUOUS LEARNING

- Currently pursuing: MCP (Model Context Protocol) Architecture for AI Tool Integration & Automation
- Hands-on experience with AI-assisted development tools: A2UI, Google Antigravity, rrweb
- Actively building projects integrating Generative AI APIs for real-world application use cases

SOFT SKILLS & LANGUAGES

Problem-Solving • Team Collaboration • Communication • Adaptability • Agile Mindset

Languages: English (Fluent) | Hindi (Native)
